

INSTRUCTIONS TO AUTHORS

1. General

Cover letter: A letter accompanying the manuscript should include a statement of any financial or other relationships that might lead to a conflict of interest, the recommended Section Editor to which the manuscript should be assigned, and the names of four potential reviewers with complete contact details. PAIN® does not publish open label trials, with the possible exception of the Clinical Notes section.

Submission of a paper to PAIN® is understood to imply that it has not previously been published (except in abstract form) and that it is not being considered for publication elsewhere.

Manuscripts submitted under multiple authorship are reviewed on the assumption that (1) all authors listed concur with the submitted version of the manuscript and with the listing of the authors; (2) authorship credit is based on important contributions in one or more of the following areas: conception and design, analysis and interpretation of data, drafting of the manuscript or making intellectual contributions to its content; (3) the final manuscript has been tacitly or explicitly approved by the responsible authorities in the laboratory or institution where the work was carried out.

If illustrations or other small parts of articles or books already published elsewhere are used in papers submitted to PAIN®, the written permission of author and publisher concerned must be included with the manuscript. The original source(s) must be indicated in the legend of the illustration in these cases, or as appropriate as a footnote to the text.

The Publisher and Editor-in-Chief regret that they are unable to return copies of submitted manuscripts.

Articles should be written in English and should be complete in all respects. The layout, style and length of article should adhere strictly to the instructions given under "Organization of the Article" and, in particular, to the reference style of PAIN®.

Manuscripts that evaluate clinical interventions must be randomized. Results that are derived from studies that are not randomized may be appropriate for the Clinical Notes section. In addition, studies should have high methodological quality and as large a representative sample as possible. If the paper is an epidemiological study it should address a new population that will help the reader to understand the impact of cultural and socio-economic factors on chronic pain.

The Editors of PAIN® endorse and strongly encourage authors of reports of clinical trials to use the CONSORT checklist, as well as the QUORUM statement used for systematic reviews found at: www.thelancet.com under Vol. 354, November 1999, D. Moher et al., "Improving the quality of reports of meta-analysis of randomized controlled trials: the QUORUM statement (both used with permission)".

The Consort E-Flowchart and checklist of items to be included when reporting a randomized trial can both be found on <http://www.consort-statement.org>. If you are submitting a manuscript of a **clinical trial** to PAIN®, you are required to submit a flowchart of your research showing the steps found in the Consort E-Flowchart. This should be submitted as a figure.

No revisions or updates will be incorporated after the article has been accepted and sent to the Publisher (unless approved by the Editors).

For all types of papers **submission to PAIN® proceeds totally online, via the WWW** using EES, the Elsevier Editorial System™ at website: <http://ees.elsevier.com/pain>

For assistance with on-line submission, please contact PAIN® at: painjournal@iasp-pain.org

2. Preparing electronic manuscripts

Keep text and graphics (and any other items) as separate files - **do not import the figures into the text file**. Name your files using the correct extension, e.g. text.doc, fig1a.eps, fig1.tif, Fig1.cdr, tbl1-6.xls, etc.

Text files should be supplied in one of the following formats: Microsoft Word or WordPerfect, Windows or Macintosh formatted. The native format is preferred over ASCII text or Rich Text Format (RTF). Please do not import a file already in a .pdf form from your files - use source files such as Word, LaTeX etc.

Ensure that the letter "l" and the digit "1" (also letter "O" and digit "0") are used properly, and format your article (tabs, indents, etc.) consistently. Characters not available on your word processor (Greek letters, mathematical symbols, etc.) should not be left open, but inserted using the EES code inserting tool, or else indicated by a unique code (e.g. galpha, @, #, etc. for the Greek letter alpha). Such codes should be used consistently throughout the entire text. Please make a list of such codes and provide a key.

As most formatting codes will be removed or replaced during the publication process, do not use excessive layout styling. Also, do not use automatic word breaking, justified layout, double columns or automatic paragraph numbering (especially for numbered references). However, do use bold face, italics, subscripts, superscripts etc. for scientific nomenclature.

When preparing tables, if you are using a table grid, please use only one whole, single grid for each separate table, and not a grid for each row. If no grid is being used, use tabs to align columns, not spaces.

Graphic files: See Elsevier's website for guidelines for preparing electronic artwork: <http://www.elsevier.com/artworkinstructions>

The following are preferred formats: *native* formats of Adobe® Photoshop and Adobe® Illustrator. If this is not possible, the graphic files may also be supplied in either TIFF, EPS, JPEG or GIF format. All type fonts used in studio-created artwork must be either "embedded" in the file or supplied separately.

All graphic files supplied as bitmap format (not vector format) in native Adobe® Photoshop, TIFF, EPS, JPEG or GIF must be submitted in sufficiently high resolution (240–300 dpi for greyscale or color images and 600–1000 dpi for line art) to allow for printing. Submission of figures you have already saved on your computer as .pdf files is to be avoided.

3. Submission of manuscripts

Full instructions for uploading data and files etc. are given on the EES website: <http://ees.elsevier.com/pain>

Do not type directly into EES; copy and paste previously typed material.

Electronic submission via EES requires at least one original word processing file; if there are any associated data files (figures, etc.), these should be included separately. It is the responsibility of the authors to create the proper files. The editorial office cannot make conversions beyond the supported file types. Do not send hardcopy manuscripts or illustrations to the Editors unless specifically requested.

Revisions: Only three versions of the paper may be permitted (i.e. the first submission and two revisions). If the concerns of the reviewers are not satisfactorily met by the second revision, it is at the discretion of PAIN® whether or not to continue with the review process. If not, the paper will be rejected. In some cases in response to the original critique, the revision may include new information that reveals significant new concerns. This may generate new requirements for revision and indeed may also be grounds for rejection.

Please note that whenever the authors are given the opportunity to revise a submitted manuscript, there is no assurance that the manuscript will be accepted.

Only after 'notification of acceptance' or 'acceptance with minor revision' will authors be requested to send two sets of hardcopy illustrations to the Elsevier Editorial Office, for the purpose of checking the quality of the processed electronic files.

4. Organization of manuscripts

EES will guide authors through the submission steps, including: Abstract, up to 6 Keywords, and the Manuscript. The manuscript must contain an Introduction, Methods, Results, Discussion, Acknowledgments and Reference List.

Length of manuscript: If the manuscript exceeds this word count, authors will be required to revise the paper. Abstract: 250 words; Introduction: 500 words, Discussion: 1500; Methods and Results: no limit. Permission to exceed these guidelines must be obtained from the Editor-in-Chief. @-PAIN submissions have different word limits, see @-PAIN section below.

Title page. The title page should include the following: (i) complete title (preferably no chemical formulas or arbitrary abbreviations); (ii) full names of all authors; (iii) complete affiliations of all authors; (iv) the number of text pages of the entire manuscript (including figures and tables) and the number of figures and tables; (v) the author to whom correspondence should be sent and this author's complete address, telephone number, facsimile number and e-mail address, and if available URL address.

Reference list:

- Citation of literature references in the text should be cited using numbers that correspond to the alphabetized and numbered reference list as follows: "Pain is made worse if you hit the already injured site [15]."
- All references cited in the text must be listed at the end of the paper. They should be typed double-spaced, and arranged alphabetically.
- All authors must be listed in the references; the use of et al is not acceptable.
- References must be complete, including initial(s) of author(s) cited, title of paper, journal, year of publication, volume and page numbers.
- For citations of books, the following uniform sequence should be maintained: author(s), title of article, editor(s), complete title of book, place of publication, publisher, year and page numbers.
- Journal titles should be abbreviated according to Index Medicus, National Library of Medicine, List of Journals Indexed, latest edition.
- Unpublished data, personal communications, and abstracts that cannot be retrieved by readers (e.g., some meeting abstracts), and other inaccessible materials should not be listed as references. Unpublished materials may be cited in parentheses within the text.
- For manuscripts containing citations that are in press, authors must have electronic copies immediately available in case reviewers/editors request these materials.
- URLs should be included for all references that are publicly accessible via the Internet.

Examples:

- [1] Adams CWM. Neurohistochemistry. Amsterdam: Elsevier, 1965.
- [2] Goldenberg DL. Psychiatric and psychological aspects of fibromyalgia syndrome. *Rheum Dis Clin N Am* 1989;15:105–115.
- [3] Goldenberg DL. Fibromyalgia and its relation to chronic fatigue syndrome, viral illness and immune abnormalities. *J Rheumatol* 1989;16:91–93.
- [4] Turner JA. Coping and chronic pain. In: Bond MR, Charlton JE, Woolf CJ, editors. *Pain research and clinical management. Proc. VIth World Congress on Pain*, Vol. 4. Amsterdam: Elsevier, 1991. pp. 219–227.

Illustrations: Authors should consult Elsevier Science's Web site for guidelines for preparing (electronic) artwork: <http://www.elsevier.com/artworkinstructions>

Journal illustrations will appear either across a single column (=8.4 cm) or a whole page (=17.6 cm). The illustrations should be numbered in Arabic numerals according to the sequence of appearance in the text, where they are referred to as Fig. 1, Fig. 2, etc. Please do **not** submit illustrations as .pdf files.

After acceptance of an article the publisher may request that electronic files of the illustrations be accompanied by a hardcopy set of the final illustrations. Any hardcopy illustrations should bear the author's name, the orientation (top, bottom, etc.) and be numbered. Hardcopy color figures should be submitted as separate prints and not be mounted on cardboard. Slides taken from labeled prints are also acceptable.

Color reproduction: There are no color charges. However, if the Editor-in-Chief concludes that the color images were not necessary, color charges will be imposed. The charges would then be EURO 300.00 for the first page involving color, and EURO 200.00 per page for all subsequent pages involving color in a given article (all prices include sales tax).

Figure legends. Provide each illustration with a title and an explanatory legend. The title should be part of the legend and not be reproduced on the figure itself. Legends should be numbered consecutively in Arabic numerals and should be placed on a separate page at the end of the manuscript and begin with the number of the illustration to which they refer. All symbols and abbreviations used in the figure must be explained.

Tables. Tables, with their captions and legends, should be intelligible with minimal reference to the text. Tables of numerical data should each be typed (with double-spacing) on a separate page, numbered in sequence in Arabic numerals (Table 1, 2, etc.), provided with a heading, and referred to in the text as Table 1, Table 2, etc. A detailed description of its contents and footnotes should be given below the body of the table.

Acknowledgments. Acknowledgments should be placed at the end of the text before the Reference List and should specify: (1) contributions that need acknowledging but do not justify authorship; (2) acknowledgments of technical help; (3) acknowledgments of financial and material support, specifying the nature of the support; (4) financial arrangements that may represent a possible conflict of interest. A **Conflict of Interest** statement **must** be included for all manuscripts within the Acknowledgments section. If there are no conflicts of interest, please explicitly state this.

Ethics of animal experiments. Authors must acknowledge that their experiments adhered to the guidelines of the Committee for Research and Ethical Issues of IASP published in PAIN®, 1983;16:109–110. Authors should indicate if the experimental work was reviewed by an institutional animal care and use committee or its equivalent.

Ethics of human experiments. Authors reporting on experimental work on humans should, where relevant, submit evidence that the work has been approved by an institutional clinical research panel or its equivalent.

Proofs. One set of page proofs in PDF format will be sent by e-mail to the corresponding Author (if we do not have an e-mail address then paper proofs will be sent by post). Elsevier now sends PDF proofs which can be annotated; for this you will need to download Adobe Reader version 7 available free from <http://www.adobe.com/products/acrobat/readstep2.html>. Instructions on how to annotate PDF files will accompany the proofs. If you do not wish to use the PDF annotations function, you may list the corrections (including replies to the Query Form) and return to Elsevier in an e-mail. Please list your corrections quoting line number. If, for any reason, this is not possible, then mark the corrections and any other comments (including replies to the Query Form) on a printout of your proof and return by fax, or scan the pages and e-mail, or by post. Please use this proof only for checking the typesetting, editing, completeness and correctness of the text, tables and figures. Significant changes to the article as accepted for publication will only be considered at this stage with permission from the Editor. We will do everything possible to get your article published quickly and accurately. Therefore, it is important to ensure that all of your corrections are sent back to us in one communication: please check carefully before replying, as inclusion of any subsequent corrections cannot be guaranteed. Proofreading is solely your responsibility. Note that Elsevier may proceed with the publication of your article if no response is received.

Page Charges. There will be no page charges for PAIN®.

Reprints. A total of 50 reprints of each paper will be provided free of charge to the corresponding author. Additional copies can be ordered at prices shown on the offprint order form, which will be sent to the author upon receipt of the accepted article at the Publisher.

Author inquiries: For inquiries relating to the submission of articles (including electronic submission), the status of accepted articles through our Online Article Status. Information System, author Frequently Asked Questions and any other inquiries relating to Elsevier, please consult <http://www.elsevier.com/authors>

For specific inquiries on the preparation of electronic artwork, consult <http://www.elsevier.com/artworkinstructions>

Contact details for questions arising after acceptance of an article, especially those relating to proofs, are provided by Elsevier when an article is accepted for publication.

@-PAIN Submissions. Authors submitting manuscripts for @-PAIN should follow all the above instructions for their submission, except for the word counts and illustration files (see below). The @-PAIN manuscript must be designated in EES as an @-PAIN type of submission (in the pull down menu on the submission page). Authors are advised to please contact the Editorial Office before attempting to submit any @-PAIN articles.

Printed summary: Each @-PAIN manuscript will have a summary that appears in the print version of PAIN®. The summary is limited to 1000 words, 1 figure or table, and 6 references. The electronic version of the manuscript has the same limits as other manuscripts: Abstract: 250 words; Introduction: 500 words, Discussion: 1500; Methods and Results: no limit.

Multimedia files: **Please contact the Editorial Office before attempting to submit these files.** The additional e-files that are submitted may include a variety of multimedia options, such as large figures, photographs, brief video clips, with or without audio content. Material submitted for publication on-line via @-PAIN must be of a high enough resolution to be viewable in a web page type format. These additional files should be uploaded only on the special page to which they will be directed during submission by EES. A maximum of 10 digital images, 2 video clips, and 2 audio files can be submitted for an @-PAIN manuscript. File limits for each figure or photograph is 1.5 mb, each video clip is limited to 3.0 mb, and separate audio content is limited to 1.0 mb.

Costs: There are no charges for material presented online, including color figures: If together with your accepted article, you submit usable color figures then Elsevier will ensure, at no additional charge, that these figures will appear in color on the web (e.g. ScienceDirect), regardless of whether or not these illustrations are reproduced in color in the printed version. Each author will be provided with a .pdf version of the text and photographs contained in the full material (print and online material), and 50 copies of the summary of the article that appears in the print version of PAIN®. Authors will not receive a reprint that includes video and audio content.

This content will be archived for PAIN® at the Dutch Royal Library, The Netherlands.
